

Children's Sustainability Report 2021

1

KYTE POWERTECH LTD.

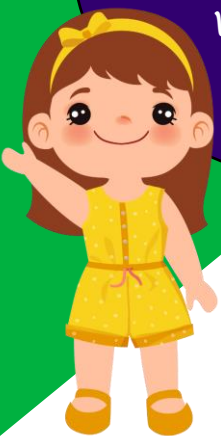

makes cool transformers that supply electricity to your homes so that you can enjoy playing video games and watch TV.

Can you spot where Ireland is on the map?

458

People work with us

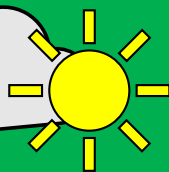

Eva is from Romania and both her parents work with us.

from

25

Countries

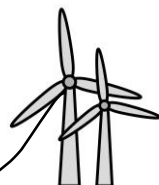

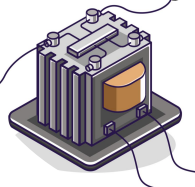

Kyte Powertech manufactures transformers which can be placed near your homes / under water / in wind turbines.

I'm Grace. My dad works as a forklift driver in the factory. He drives a battery operated forklift which is good for the planet.

SUSTAINABILITY is all about making small changes for the people, animals, plants and the planet so that we can all live happily!

KYTE POWERTECH works hard to choose the right materials such as steel, aluminium and oil to design our products in a way that they are less harmful for the planet.

In **KYTE POWERTECH'S SUSTAINABILITY** journey we focus on some key points that look at

The needs of our employees

The planet

Our products

SUSTAINABILITY

Quality Education

- We provide learning opportunities for our employees and always encourage them to learn something new.
- Students from schools and colleges work with us and learn fun skills like welding, forklift driving, and working together as a team.

Gender Equality and Reduced Inequalities

- We treat everyone with respect and kindness!
- It is important to treat everyone equally.

Hi, I'm Sophia. When I grow up I want to be an engineer.

SUSTAINABILITY

Decent Work

- Our employees are provided with a safe and healthy workplace.
- We make sure everyone wears safety boots and goggles when they work in our factory.
- We work with companies who supply us with materials to build transformers to ensure that they keep their employees safe too.

Clean Energy and Climate Action

- We use electricity that is generated from wind turbines and solar panels to make our transformers.
- We make sure that whatever we do in our factory does not harm our planet.

SUSTAINABILITY

What can you do?

1. Switch off electrical appliances when not in use.
2. Ride a bicycle or walk to school. Your little bit saves the planet.
3. Plant trees in your school or backyard.
4. Try to stop using as many plastics as you can.
5. Reuse as much plastic as you can. You can use an empty bottle to make a bird feeder for your garden
6. Separate your waste so that it can be easily recycled.
7. Don't waste water. Don't forget to turn off the tap when you brush your teeth
